

Dubai Festival City

City Infrastructure Project 2005 - in United Arab Emirates

ACO. The future of drainage.

ACO line drainage – monocast ACO DRAIN® Monoblock

Dubai Festival City is a large residential, business and entertainment development in the city of Dubai, United Arab Emirates. Touted as a "city-within-a-city", Dubai Festival City is the Middle East's largest mixed-use development: all elements for work, living, and leisure will be contained within the project. Once completed Festival City will comprise a series of residential communities, numerous hotels, malls, a golf course and other entertainment sites, and a full suite of public services, including schools. Construction of the development, which was undertaken by Al Futtaim Carillion, began in 2003 and is expected to take 12 years. The project spans 3.8 kilometres (2.4 mi) of water frontage on the eastern bank of Dubai Creek and is 2 kilometres (1.2 mi) from Dubai International Airport. As of mid-2006, investments in the project had exceeded 11 billion AED (3 billion USD).
