

Four Seasons Beach Resort in Dubai

Project in 2012/14 - United Arab Emirates

ACO. The future of drainage.

ACO Building drainage and manhole covers for a luxury five star hotel at Jumeirah Beach

The project involves construction of a resort comprising a basement level, a ground floor and 6 additional floors offering 237 rooms including 188 guest rooms, 46 luxury suites, two presidential suites and an exclusive royal suite.

The project also includes a ballroom, spa, fitness center, restaurant, a roof top bar and lounge including recreational facilities such as tennis courts, swimming pools, retail facilities other small cafes along with food and beverage outlets.

With a prime beach-front location and convenient access to the main commercial district on Sheikh Zayed Road, Four Seasons Resort Dubai at Jumeirah Beach is the most highly anticipated addition to Dubai's luxury hotel scene.

The property will be situated on a 11-acre (4.45 hectare) natural waterfront site along the Arabian Gulf. Four Seasons Resort Dubai at Jumeirah Beach has been designed by world renowned architect WATG, with interior design by San Francisco based BAMO.

ACO Shower channels with tile type gratings in stainless steel
