

King Abdullah Financial District in Riyadh

Mega project 2011/12 in Kingdom of Saudi Arabia

ACO. The future of drainage.

Polymer channels with brickslot elements, Profiline stainless steel channels and floor drain solutions

The King Abdullah Financial District will house the large community of professionals working within the financial sector and related industries, hosting the head quarters of the Capital Market Authority, the Stock Exchange, banks, financial institutions and other service providers such as accountants, auditors, lawyers, analysts, rating agencies, consultants, and IT providers. The King Abdullah Financial District provides the next generation of development and will ensure the sustained dominance of Saudi Arabia as the largest economy and financial centre within the region. Centrally located on Riyadh's King Fahd Highway, the development will feature more than 40 towers with all the facilities, amenities, utilities and transport networks you would come to expect in a well-designed city of the 21st century.
